Pune - 411011 | +91 7058524533 | raghavdashrath10@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PERSONAL PROFILE

I am a recent B.Tech graduate in AI & Data Science with a strong understanding of machine learning, data analysis, and problem-solving. I enjoy working with data, breaking down complex problems into simple steps, and continuously learning new technologies. Through academic projects and hands-on practice, I have developed practical experience in working with real-world datasets and building data-driven solutions. I am looking for an opportunity to contribute to meaningful projects, learn from experienced professionals, high-performance team.

EDUCATION

AISSMS Institute of Information Technology, Pune.

Sept 2022 - 2026

BTech

• **CGPA:** 7.71

Rashtramata Jr. College, Jalna.

Mar 2022

HSC

• **GPA:** 66.50 %

S.B. High School, Jalna.

Mar 2020

SSC

• **GPA:** 95.40%

WORK EXPERIENCE

Elite Softwares

Mar 2025 - Apr 2025

Web Development Intern

- Engineered interactive, responsive websites using HTML, CSS, and Bootstrap, demonstrating strong front-end development skills.
- Developed backend systems with Django and Python to manage database connectivity and support efficient data handling.

PROJECTS

Cognitive Digital Health Expert Twin | Generative AI & RAG

- Implemented a multimodal clinical support system using a RAG pipeline grounded in a 6-volume medical corpus, integrating OpenAI Whisper (STT) and Llama Vision for seamless voice and image-based diagnosis.
- Designed a privacy-first architecture using FAISS vector indexing and SQLite to maintain persistent patient history while ensuring 94% diagnostic grounding through localized inference.

Brain Tumor Detection | Deep Learning

- Developed a deep learning model to detect brain tumors from MRI images with high accuracy.
- Utilized CNN architectures for image classification and preprocessing techniques to enhance model performance.
- GitHub Repository Link - [🔗](#)

Crop Disease Detection | Deep Learning

- Designed and implemented a deep learning model to detect and classify crop diseases from image data, covering 24 classes across various plant types.
- Applied convolutional neural networks (CNNs) for accurate and efficient disease identification.
- Link - [🔗](#) GitHub Repository Link - [🔗](#)

SKILLS AND EXPERTISE

- **Technical Skills:** Machine Learning, Deep Learning, Data Analysis, Data Visualization, Data Science, Web Scraping, Web Development, MySQL.
- **Programming Languages:** C++, Python, HTML, CSS, SQL.

SOFT SKILLS

- Teamwork & Collaboration
- Problem-Solving
- Critical Thinking

EXTRA-CURRICULAR ACTIVITIES & ACHIEVEMENTS

- Authored research paper on "Generative AI-Driven Health Expert Twin" accepted for publication at the **IEEE 2nd ICIIT 2026** (I²IT, Pune).
- Completed 4 levels of Tabla (*Madhyama pratham*).
- State level badminton player.
